

at the Edge

GlobeRanger is the leading provider of RFID, mobility and sensor-based software solutions. Its innovative iMotion™ Edgware™ platform provides the critical infrastructure layer for managing devices, networks, data, and processes at the edge of the enterprise, enabling real-time response. iMotion serves as the foundation for GlobeRanger and its partners to rapidly develop, deploy, and manage edge solutions.

- Atos Origin
- CIBER
- ESYNC
- Enterprise Information Systems
- Franwell
- HighJump Software
- International Paper
- IDentiTRAK Technologies
- Psion Teklogix
- RedPrairie
- Ross Systems
- SoftBrands
- SSA Global
- Unisys

**Businesses today need ever-increasing visibility and relevant data in order to compete.** Two key technology trends are driving breakthrough levels of information visibility. First, the proliferation of wireless devices are allowing businesses to capture data anywhere in real-time. Second, the new generation of low-cost RFID and sensor-based systems are being incorporated into critical business processes, generating new sources of information.

As wireless, RFID and sensor-based systems extend computing to the far-flung edges of the enterprise, a new architecture layer is needed to control and manage the physical infrastructure as well as to leverage new types of data for real-time response. GlobeRanger provides the industry-leading Edgeware platform, iMotion, with comprehensive capabilities for controlling edge **devices**, managing device **networks**, transforming **data**, and optimizing business **processes**.

GlobeRanger partners have leveraged iMotion to develop solutions for:

- Meeting RFID mandates from Wal-Mart, the Department of Defense and others
- Tracking individual bottles of Schedule II drugs to prevent theft and counterfeiting
- Deploying RFID technology for distributing food products through the grocery supply chain
- Automating shipping and receiving processes through RFID portals for warehouse efficiencies

In the near future, edge technologies will be incorporated into every aspect of business processes. GlobeRanger is providing the underlying technology platform that simplifies the development, deployment and management of edge solutions. Our products give our partners a standard construct for rapid application development and end-user companies a highly flexible, scalable, extensible platform for growth.

### Hardware Partners:

- Alien
- AWID
- AXCESS
- Intermec
- Matrics
- Printronix
- Psion Teklogix
- SAMSys
- Symbol
- Texas Instruments
- Tyco/Sensormatic
- Venture Research
- Zebra
