Unlock the potential of Microsoft Azure and AWS IoT

Manage devices at the edge and transform their critical data into valuable business insights.

GlobeRanger iMotion™ Data Orchestration at-a-glance

- › Centrally manage connected devices at the edge of the enterprise.
- › Reduce connectivity requirements and Azure and AWS consumption costs.
- › Highly scalable from small to enterprise level.
- › Operations can continue even when connectivity is impaired or down.
- › Make informed decisions as to which data stays on-premise or is sent to the Azure or AWS cloud.
- › Filter raw data at the edge and transform into actionable information including alerts.

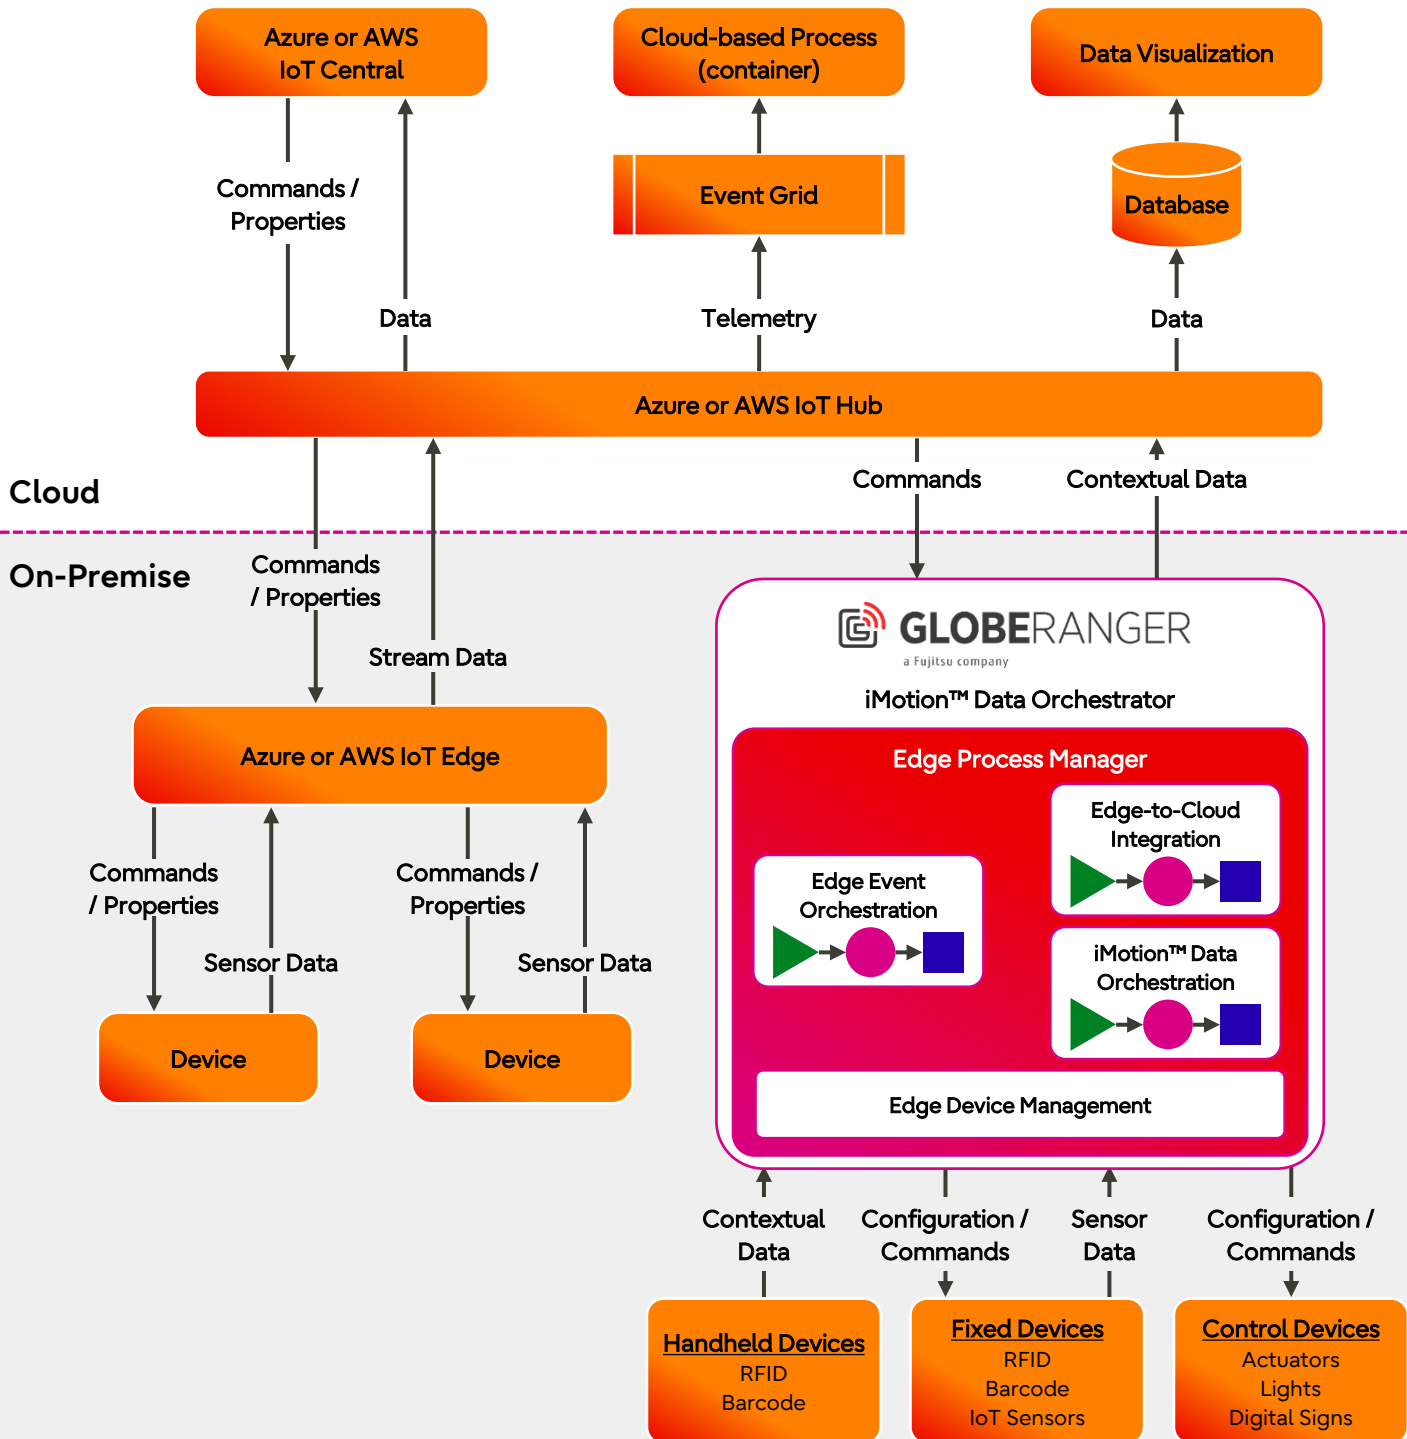

Business success today relies on the ability to effectively collect and transform data to extract valuable insight into its operations and customers. With the exponential growth of data collected via a rapidly growing number of IoT devices, organizations are increasingly turning to the cloud to help manage the devices and secure the data. To help leverage their investment, unlock further productivity gains and boost efficiency, **GlobeRanger's iMotion™ Data Orchestration** integrates with Azure IoT and AWS IoT.

GlobeRanger's iMotion™ Data Orchestration helps businesses regain control of their raw edge data. It manages edge devices such as IoT sensors, RFID readers, and other digital devices and captures the data they generate. The data orchestrator then filters the data based on the customer's parameters and determines whether to create an alert, forward to a back-end application or database, or send to the cloud for further processing or analytics.

As a result, connectivity and consumption costs are optimized, and the basic information translated into valuable and actionable real-time insights. Businesses can maximize the potential of Azure and AWS IoT to deliver the business transformation and value demanded in the market today.

GlobeRanger iMotion™ Data Orchestrator Architecture

Manage devices and add business context to IoT data at the edge of the enterprise

Why choose GlobeRanger?

GlobeRanger IoT and Asset Tracking Solutions are flexible and scalable, and our end-to-end implementation service means you can start small and realize value early in the solution deployment. GlobeRanger is hardware independent, we match best-of-breed devices, sensors and RFID tags to your requirements.

GlobeRanger delivers rapid time-to-value. Our patented emulation technology allows us to architect, design and implement solutions in days or weeks. By focusing on our customer's specific needs and requirements we can create early wins that enable our customers to meet or exceed their business case and ROI expectations.

GlobeRanger – improving the visibility of our customer's operations since 1999

GlobeRanger was founded in 1999 to help organizations improve the visibility of their business operations. Using a combination of our technology platform and years of specialist experience, we simplify the development, deployment, and management of IoT technology and sensor-based solutions. Today, we are widely recognized as an industry leader in IoT Enablement and RFID-based Asset Tracking Solutions. As an end-to-end solution provider, we work with our customers across a broad range of industries to deliver the most reliable, scalable, and flexible enterprise edge solutions, at the lowest cost of ownership.

Our innovative approach was strengthened further in 2014 when GlobeRanger was acquired by Fujitsu.

GlobeRanger's solid grounding in IoT Enablement and Asset Tracking Solutions now benefit from the backing of one of the world's largest technology firms. Worldwide support and access to a \$1.6 billion annual R&D budget has helped us to retain our agility to move quickly and spearhead the latest industry developments.

Leveraging Fujitsu global footprint and financial strength, Fujitsu and GlobeRanger collaborate to bring best-in-class solutions for industrial IoT and manufacturing, distribution and logistics, aviation, defense and many other industries. The combination of Fujitsu financial strength and industry knowledge combined with GlobeRanger's IoT and RFID expertise bring our customers the high value, low risk solutions they need to transform their organizations.
